Re: Letter of Recommendation for Ice House & Associates

The student body, administration, and myself would like to applaud Ice House for all of the time and cooperation it has lent our high school. Ice House has always taken into consideration the lyrical language used in the music they use during our rallies and other school events. At a high school it is important that organizations are able to celebrate school life with professionalism respected by the faculty and administration. Ice House has always stayed true to dates that I and other faculty and students have scheduled with them.

Many activities are limited in time, and Ice House has always taken our agendas into consideration so that our activities are never interrupted, delayed, or shortened. Perhaps one of the most extraordinary aspects Ice House is that they frequently offer free services to public schools. This is very useful because the Associated Student Body (ASB) is forever trying to raise funds to improve things like the campus environment and academics of the student body.

Scripps Ranch High School would be honored to recommend Ice House to any other school or organization needing D.J. or any other sound assistance.

Sincerely,

A handwritten signature in cursive script that reads "Alison Mosley".
